

Unwin is the leading name in passenger safety solutions.

As part of our continuous commitment to customer services, we are pleased to offer transport professionals a range of training sessions to improve product understanding and promote good practice within our industry. We recommend that our Head office premises in Martock, Somerset, are used wherever possible as we have all the necessary facilities to hand and available for the training sessions.

Training can sometimes be conducted at your premises for known group sizes within set limits.

Times:

Training will start promptly at 9.00am. We aim to be finished by approximately 5pm, however, depending on the group involved this can sometimes over-run.

In-House Training:

Unwin in-house training facility provides a comfortable learning environment for all participants. The fully equipped training room will contain all the latest Unwin products to facilitate a comprehensive training programme.

Should you require it, we are able to suggest a range of local hotel services which are available for those who need to stay overnight. Hotels are not included in the cost of training sessions. We would suggest that you make your own arrangements of reservations to avoid confusion.

Technical Training

Our 6 hour technical training is aimed at workshop technicians and support engineers who seek to gain the necessary skills to install, set-up and adjust a range of inboard tail lifts.

The training will include the following topics:

- Lift functions
- User/Dealer Benefits
- Universal product installation
- Electrical and Hydraulic systems fault finding
- General fault finding process
- Getting support

On completion of this training, delegates will have the required abilities to be classified as a 'Competent Person' to complete a Service.

The session will conclude with a simulated fault finding exercise that forms the basis of the course assessment.

Our Technical Training is run for a maximum of 8 people.

Weight Testing Training

Our 2 hour training course will cover all the necessary steps required to complete a full examination and weight test on a BraunAbility DPA Wheelchair Lift to comply with current LOLER requirements.

The training will include the following topics:

- Commissioning requirements
- Service instructions
- Administration and documentation

The training course will be concluded with a practical session where delegates will be required to complete a weight test to meet industry standards.

Our Weight Testing Training is run for a maximum of 8 people.

Unwin Technical Training:	£250 per person (includes Lunch and refreshments)
Unwin Weight Testing Training:	£50 per person (includes refreshments)
Complete Lift Training Package:	£275 per person (includes Lunch and refreshments)
